Equine Touch is a non-diagnostic, non-invasive energy-release discipline that works at a complete wholistic level; it addresses the horse as a whole without paying any particular attention to the named problem as such while providing unique procedures for addressing areas of concern. The Equine Touch courses teach a unique set of hands-on procedures to be performed over specific points of the musculoskeletal framework in a specific direction and pattern. When performed with accuracy, integrity, and intent these moves unlock the innate wisdom of the body encouraging it to reset itself and release energy blocks, thus bringing about balance and health on all levels - physical, emotional, and behavioral.
